

Working with experienced media professionals, Youth Times gives young people aged 13 to 19 the opportunity to use the latest multimedia technology, gain skills, be creative and **have fun!**

Through our workshops we inspire young people to use media to explore issues, debate, create and express themselves. All their work is showcased on InSITE, www.insitemag.net, the exciting web magazine for young people.

We are offering our most comprehensive range of activities ever, including brand new film making, animation, photography and podcasting workshops. **Check them out!**

InSITE

InSITE is an online magazine created by and for young people. It's a space where you can see your work published, tell people what you think, as well as keeping in touch with what's going on and chatting on the InSITE forum.

If you can't make the workshops and would still like to see your work on InSITE (www.insitemag.net), you can also get involved by sending us your articles, photos, graphics, films and music anytime! You don't need any previous experience, just bags of enthusiasm and to want to see your creations on the web.
